

Tips for Users

The project „SHE-in Europe“ has been set up on the internet at <http://austria.she-in-europe.eu/>

The information platform offers plenty of information. It primarily comprises three main parts:

- The first main item is the learning software „Selbst-ständig ist die Frau – vom Wunsch zur Wirklichkeit“ SHE-Tool:.
- 2nd main item: further information (glossary, downloads, Links etc.) on the internet page.
- 3rd main item: interactivity

The first main item is the learning software „Selbst-ständig ist die Frau – vom Wunsch zur Wirklichkeit“ „SHE-Tool“:

It serves the communication of basic information concerning the following points:

With the She-tool, great care has been taken to contribute basic information that is long-lasting. Because - „legal regulations are subject to changes“ – which holds especially true for the chapters

- „....the legal“ and
- „... and what about the money?“ respectively.

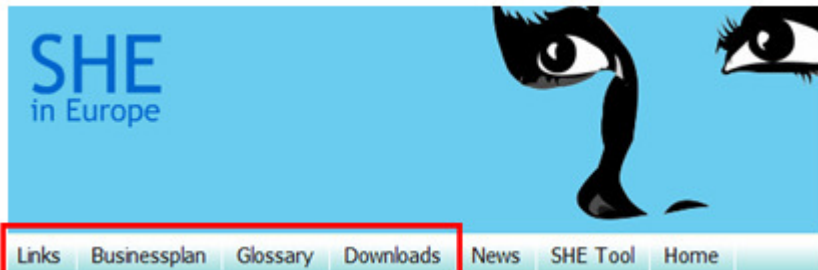

We therefore paid attention not to give too detailed information in these areas (note in the learning program that the information refers to state of 2009.)

Updates and detailed information, respectively, are available for the following points on the SHE-main page:

2nd main item: further information on the internet page

The information about the following points refers to the contents of the learning program and provide further, deepening material.

- **Links** referring to the SHE-tool; (structured according to chapters)
- Information for designing a business-plan
- A **glossary** of economic terms
- **Downloads** with worksheets, forms, further information, etc. (structured according to chapters)

Hint:

You can use the „notepad“ for working on the „SHE-tool“. (You find this Excel-document among downloads in the section "sonstige Downloads" ["other downloads"]) . Divided into chapters and modules, you can document which contents have already been worked on and for which points comments are available, respectively.

3rd main issue: interactivity

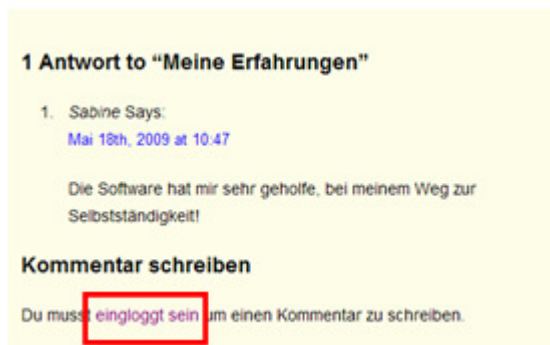

This part lives by trainers and participants delivering postings. The rubric „Erfahrung“ [„experience“] provides a forum for learners.

Use this forum for exchanging opinions – and make contacts!

- What have I got to say to the founders?
- In which branch– with what idea do I want to make myself self-employed?
- Could I benefit from the information on the internet pages?
- How does my foundation progress?
- Which recommendations can I give others?

In order to create a posting yourself you need to be „logged in“ (that is, registered). For this it is necessary to register first.

Click on „...eingeloggt sein...“

If you do not have any access data (username and password) you can register here. A new window pops up.

The image shows the WordPress registration interface for the German edition (DE-Edition). At the top left is the WordPress logo, followed by the text "WORDPRESS DE-Edition". Below this is a yellow box with the text "In diesem Blog registrieren.". The main registration area contains three input fields: "Benutzername" (username), "E-Mail-Adresse" (e-mail address), and a field for a password with the text "Ein Passwort wird dir zugesendet." (A password will be sent to you). A blue "Registrieren" (register) button is positioned to the right of the password field. At the bottom of the form, there are two links: "Anmelden" (login) and "Passwort vergessen?" (forgot password?).

Fill in the fields „Benutzername" [user name] and „E-Mail-Adresse" [e-mail address]. Click on „Registrieren" [register] afterwards. You immediately receive an e-mail with your personal user data.

Enter your user name and your password and you can post messages instantly.
